

Astronomy 400-B project

Chirag Rathi

24 February 2020

1 Research Project Topic

What will be the fate of the stars at Sun's location (8 kpc from the galactic center) but in M31's disk?

Research question— Visualize the night sky from the perspective of an observer on an M31 Sun throughout the merger.

NOTE: I have another research project in consideration but I am not sure how much I will be able to accomplish in it. Therefore, I will talk to Dr. Besla this week and discuss about the potential of my other research project.
